AGRICULTURE IN PAKISTAN

Pakistan's agriculture sector plays a central role in the economy as it contributes 18.9 percent to GDP, absorbs 42.3 percent of labour force and constitutes 75% of total exports revenue. The agriculture sector continued to show improved performance and recorded the highest growth in last 13 years on account of government's supportive policies. The government is focusing on supporting small and marginalized farmers and promote small scale innovative technologies to promote growth in this sector.

Furthermore, Government is making investments in new seeds, farming technology and techniques, mechanization and the water infrastructure which will ensure high return and generate employment in rural areas reducing rural poverty. Government has a mission to develop a science-based, vibrant and internationally linked agriculture sector that not only meet the food security challenges but also competes in domestic as well as in international markets.

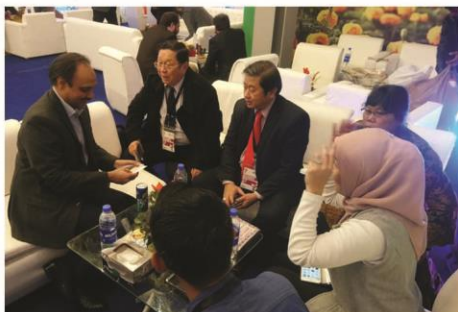

- During 2017-18, agriculture sector recorded a remarkable growth of 3.81 percent.
- Livestock having share of 58.92 percent in agriculture and 11.11 percent in GDP, recorded a growth of 3.76 percent.
- Poultry sector is one of the most vibrant segments of livestock sector in Pakistan. This sector provides employment (direct /in-direct) to over 1.5 million people and contributes 1.4 percent in GDP.
- Favorable agro-climatic zones.
- Huge irrigated land exists.
- There's an abundant supply of skilled, educated, technical and scientific workforce.
- Pakistan is home to 5% of the world fruit production particularly for mango and citrus.
- Agricultural startups are fast growing sector, unleashing umpteen opportunities and strengthening the supply chain in Pakistan's agricultural scenario.
